

# Lab 8: React quiz with scoring

Software Engineering Prof. Bradford

Due date: See HuskyCT

## Objective

Update the score of quizzes – refactor the scoring functionality into a controller folder.

Build on your current quiz system by adding a page.

Add testing. Functional testing as well as unit testing.

## Preparation

Work from the provided React quiz system.

## What to hand in

Put all code in a zip file. **Do NOT include the node\_modules folder.**

Video of the quiz and the refactored and updated system working. Also the addition of another page. You should focus on making it look good.

Directions for working your code: at most three steps to get the system running by the instructor.
